California OES Weekly Weather Threat Briefing

November 12, 2017
5:30 PM PDT

Day 1: Valley rain and high elevation snow. Strong, gusty winds and rain could cause downed trees and powerlines.

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

Prepared by: Leslie Waite-Smith
801-524-7907

Key Points

11/13 – 11/20

Monday

- Another round of light valley rain and high elevation snow possible
- Winds will be strong and gusty at times with potential for downed trees and possible power outages.

Late Tuesday-Wednesday.

- Moderate rainfall will move across Northern and Central CA with rainfall rates (and amounts) high enough to result in minor urban flooding. Leaf clogged drains will also add to potential for urbanized flooding. Rockslides and/or mudslides are possible over recent burn scars.

Thursday-Early Friday

- The final weather system of the week will be colder with snow levels falling to pass level (and below). Snow accumulations and gusty winds will lead to hazardous travel conditions, especially through mountain passes.

Saturday-Sunday

- No significant weather or water hazards expected at this time

California OES Impact Threat Matrix

Nov 13 – 20, 2017
